

FOR IMMEDIATE RELEASE

POWER OF THE SCEPTER

Terry L. Krohn's New Novel

Get ready for a thrilling ride as the journey into a realm of financial corruption continues in this sequel to author Terry L. Krohn's best-selling novel *Eye of the Pyramid* ("An *enthraling and adventurous tale*", Midwest Book Review).

Terry Krohn writes terrific fiction yet in many ways, using social and financial commentary integrated into the storyline of *Eye of the Pyramid* and now *Power of the Scepter*, also comes closer to the truth of world affairs than the New York Times, the Wall Street Journal and the Financial Times do. Krohn, who is a technical analyst in the area of finance, offers insight into the shadowy world of market manipulation and self-serving monetary policy – topics of major concern in the news of today.

Power of the Scepter opens with physicist Dr. Paul Malone finding ancient artifacts hidden in a secret room below the Coral Castle in Homestead, Florida. These artifacts contain power beyond imagination created fifty thousand years ago by an advanced civilization. The Society, a centuries-old secret organization dedicated to manipulating the world's monetary system, is aware of Paul's discovery. Responsible for the deaths of Christ and Lincoln, sponsors of despots such as Adolf Hitler, and driven by an insatiable lust for power, its leaders will stop at nothing to get the artifacts for themselves. And they have a powerful ally – the Mutant, a soulless genetic creation whose true identity remains a mystery until the end of this rollercoaster ride of a story.

People sense the reality behind Terry's novels, and he presents his analysis of oil, gold and inflation with compelling evidence. His work speaks to contemporary issues which include:

**The True Nature of Inflation and its Relationship to Oil and Gold*

**The Rise and Fall of Fiat (Paper) Regimes – The Dirty Little Secret*

**Current Energy Policy – An Oxymoron*

**The Increasing Role of Corporations in Governance – Is Congress Selling Out the American People?*

BIO

A Phi Beta Kappa graduate, Terry L. Krohn is a published editorial writer / technical analyst in the area of finance. His first novel *Eye of the Pyramid* achieved Amazon best seller status in December of 2005.
